

Barrel Clamps

Barrel Clamp - Known as "Barrel Clamp", this hydraulic accessory is utilized on forklifts in order to compress objects that you want to move with the lift truck. Typically, they're used in order to paper rolls, barrels, and handle kegs, along with several barrel clamp designs having the ability to rotate the cargo. For example, the revolving function enables the individual operating the forklift to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
