## **Utility Buckets**

Utility Bucket - "Slip on the forks" accessory buckets or also known as Universal Fit buckets could be used with any model or design of extendable reach forklift. If your unit can't be matched with a quick-tach unit, another brand new or used universal fit bucket can be located as an alternative. Standard universal forklift buckets connect to forks which are up to six inches wide and are forty eight inches long. Larger fork pockets can be prearranged via an account manager upon request.

For the reason that they slip directly onto the blades, universal fit buckets stay on the machinery and are much less susceptible to destruction. As opposed to the quick-tach bucket models, universal fit buckets are fifty percent. This extra space makes them perfect for carrying irregular shaped loads like tearing off roof trash, elevating roof gravel, moving large debris piles, broken up concrete and backfilling behind walls.

## **Quick-Tach Buckets**

Quick-Tach Buckets are made for extendable-reach forklifts. They are made to allow placement of material far beyond the reach of a loader. A hardened beveled cutting blade on the leading edge and on both sides reinforces strength, resistance to damage and provides supreme durability. Quick-Tach forklift buckets are augmented by scuff bars along the bottom of the unit which shield it from scrapes.

Quick-Tach forklift buckets could be utilized to swap the carriage and forks that weigh between 100-700lbs. Once installed, these buckets free up more of the unit's load capacity, enabling it to handle heavier and larger objects. The Quick-Tach is able to dump stuff approximately 1.5 feet higher due to the shorter depth of its bucket. These buckets are built in a customized fashion so as to meet all the specifications of certain models and makes of lifts. It is vital to confer with a construction equipment specialist in order to find the modified Quick-Tach bucket solution for all your requirements.

Lift truck bucket accessories are great for construction work on the ground level. They could be utilized so as to transport snow in the northern areas, gravel and even sand. Clean-up on the jobsite could be likewise be accomplished utilizing a forklift bucket. The many purposes the bucket could accomplish saves the company a lot of time and money as it does need to completely switch tools or machinery and this could help avoid running into overtime.
